

Online Bookstore Database Setup Script - MYSQL Challenge

Tiwari Anuj

Data Analyst

INTRODUCTION

"Explore the 'Online Bookstore Database Setup Script' to efficiently create and populate a database for managing book titles, customer information, orders, and more. This script simplifies the process of setting up an online bookstore's backend data structure."

1. Create Database

-- Create the Bookstore database

```
CREATE DATABASE Bookstore;
```

```
USE Bookstore;
```

2. Create Table

-- Create the 'books' table to store book information

- **CREATE TABLE** books (
 book_id **INT PRIMARY KEY AUTO_INCREMENT**,
 title **VARCHAR(255) NOT NULL**,
 author **VARCHAR(255)**,
 genre **VARCHAR(50)**,
 publication_year **INT**,
 price **DECIMAL(10, 2)**,
 copies_sold **INT**
);

3. Insert Data into Books Table

```
-- Insert sample data into the 'books' table
INSERT INTO books (title, author, genre, publication_year, price, copies_sold)
VALUES
    ('The Great Gatsby', 'F. Scott Fitzgerald', 'Fiction', 1925, 9.99, 500),
    ('To Kill a Mockingbird', 'Harper Lee', 'Fiction', 1960, 10.99, 600),
    ('1984', 'George Orwell', 'Science Fiction', 1949, 8.99, 750),
    ('Pride and Prejudice', 'Jane Austen', 'Romance', 1813, 7.99, 900),
    ('The Hobbit', 'J.R.R. Tolkien', 'Fantasy', 1937, 12.99, 450),
    ('The Catcher in the Rye', 'J.D. Salinger', 'Fiction', 1951, 9.99, 550),
    ('The Hunger Games', 'Suzanne Collins', 'Science Fiction', 2008, 11.99, 700),
    ('Harry Potter and the Sorcerer''s Stone', 'J.K. Rowling', 'Fantasy', 1997, 14.99, 800),
    ('The Da Vinci Code', 'Dan Brown', 'Mystery', 2003, 10.99, 600),
    ('The Alchemist', 'Paulo Coelho', 'Fiction', 1988, 8.99, 950);
```

4. Create Customers Table

-- Create the 'customers' table to store customer information

- **CREATE TABLE** customers (
 customer_id **INT PRIMARY KEY AUTO_INCREMENT**,
 first_name **VARCHAR(50) NOT NULL**,
 last_name **VARCHAR(50) NOT NULL**,
 email **VARCHAR(100) UNIQUE NOT NULL**,
 phone_number **VARCHAR(20)**,
 address **VARCHAR(255)**
);

5. INSERT Data into Customers Table

```
-- Insert sample data into the 'customers' table
INSERT INTO customers (first_name, last_name, email, phone_number, address)
VALUES
    ('John', 'Doe', 'johndoe@example.com', '+1234567890', '123 Main St, Anytown, USA'),
    ('Jane', 'Smith', 'janesmith@example.com', '+9876543210', '456 Elm St, Othercity, USA'),
    ('Alice', 'Johnson', 'alice@example.com', NULL, '789 Oak St, Anothercity, USA');
```

6. Create Order Table

-- Create the 'orders' table to store order information

```
CREATE TABLE orders (  
    order_id INT PRIMARY KEY AUTO_INCREMENT,  
    customer_id INT,  
    order_date DATE,  
    total_amount DECIMAL(10, 2),  
    FOREIGN KEY (customer_id) REFERENCES customers(customer_id)  
);
```

7. INSERT Data into Orders Table

-- Insert sample data into the 'orders' table

- **INSERT INTO** orders (customer_id, order_date, total_amount)
VALUES
 (1, '2022-08-15', 45.97),
 (2, '2022-08-16', 33.98),
 (3, '2022-08-17', 28.99);

8. Create Order_Items Table

-- Create the 'order_items' table to store items within each order

- ```
CREATE TABLE order_items (
 order_item_id INT PRIMARY KEY AUTO_INCREMENT,
 order_id INT,
 book_id INT,
 quantity INT,
 item_price DECIMAL(10, 2),
 FOREIGN KEY (order_id) REFERENCES orders(order_id),
 FOREIGN KEY (book_id) REFERENCES books(book_id)
);
```

## 9. INSERT Data into Order\_Items

-- Insert sample data into the 'order\_items' table

- **INSERT INTO** order\_items (order\_id, book\_id, quantity, item\_price)  
**VALUES**  
    (1, 1, 2, 19.98),  
    (1, 3, 1, 8.99),  
    (2, 2, 3, 32.97),  
    (3, 5, 2, 25.98);

# 10. Books Table:

```
select * from books;
```

# Questions - Challenge

1. What are the details of all books purchased in the year 2022?

```
--> SELECT o.order_id, COUNT(oi.book_id) AS total_number_of_books,
 b.title, b.author, b.genre, b.price, SUM(b.price) AS total_cost
FROM orders o
JOIN order_items oi ON o.order_id = oi.order_id
JOIN books b ON oi.book_id = b.book_id
WHERE YEAR(o.order_date) = 2022
GROUP BY oi.book_id;
```

2. What is the total number of books sold by each customer?

```
--> SELECT c.customer_id, CONCAT(c.first_name, ' ', c.last_name) AS customer_name,
 COUNT(oi.book_id) AS number_of_books_purchased
FROM customers c
JOIN orders o ON c.customer_id = o.customer_id
JOIN order_items oi ON o.order_id = oi.order_id
GROUP BY c.customer_id;
```

3. What **is** the total revenue **generated by each** customer?

```
--> SELECT c.customer_id, CONCAT(c.first_name, ' ', c.last_name) AS customer_name,
 SUM(b.price) AS total_revenue
FROM customers c
JOIN orders o ON c.customer_id = o.customer_id
JOIN order_items oi ON o.order_id = oi.order_id
JOIN books b ON oi.book_id = b.book_id
GROUP BY c.customer_id;
```

4. What are the details of the books purchased by each customer?

```
--> SELECT c.customer_id, CONCAT(c.first_name, ' ', c.last_name) AS customer_name,
 oi.book_id, b.title, b.author, b.genre, b.price
FROM customers c
JOIN orders o ON c.customer_id = o.customer_id
JOIN order_items oi ON o.order_id = oi.order_id
JOIN books b ON oi.book_id = b.book_id;
```

5. What **is** the total revenue **generated by each** book genre?

```
--> SELECT b.genre, SUM(b.price) AS total_revenue
FROM books b
JOIN order_items oi ON b.book_id = oi.book_id
JOIN orders o ON oi.order_id = o.order_id
WHERE YEAR(o.order_date) = 2022
GROUP BY b.genre;
```

6. What are the details of the books purchased in the year 2021 by customer 'Jane Smith'?

```
--> SELECT c.customer_id, CONCAT(c.first_name, ' ', c.last_name) AS customer_name,
 oi.book_id, b.title, b.author, b.genre, b.price
FROM customers c
JOIN orders o ON c.customer_id = o.customer_id
JOIN order_items oi ON o.order_id = oi.order_id
JOIN books b ON oi.book_id = b.book_id
WHERE c.first_name = 'Jane' AND c.last_name = 'Smith' AND YEAR(o.order_date) = 2021;
```

7. What is the total revenue generated by the sales of books in the 'Fiction' genre?

```
--> SELECT b.genre, SUM(b.price) AS total_revenue
FROM books b
JOIN order_items oi ON b.book_id = oi.book_id
JOIN orders o ON oi.order_id = o.order_id
WHERE b.genre = 'Fiction'
GROUP BY b.genre;
```

8. What is the total revenue generated by the sales of books in the 'Mystery' genre in the year 2022?

```
--> SELECT b.genre, SUM(b.price) AS total_revenue
FROM books b
JOIN order_items oi ON b.book_id = oi.book_id
JOIN orders o ON oi.order_id = o.order_id
WHERE b.genre = 'Mystery' AND YEAR(o.order_date) = 2022
GROUP BY b.genre;
```

9. Who is the customer who purchased the most number of books in the year 2023?

```
--> SELECT c.customer_id, CONCAT(c.first_name, ' ', c.last_name) AS customer_name,
 COUNT(oi.book_id) AS number_of_books_purchased
FROM customers c
JOIN orders o ON c.customer_id = o.customer_id
JOIN order_items oi ON o.order_id = oi.order_id
WHERE YEAR(o.order_date) = 2023
GROUP BY c.customer_id
ORDER BY COUNT(oi.book_id) DESC
LIMIT 1;
```

10. Who is the customer with the highest total spending in the year 2022?

```
--> SELECT c.customer_id, CONCAT(c.first_name, ' ', c.last_name) AS customer_name,
 SUM(b.price) AS total_spending
FROM customers c
JOIN orders o ON c.customer_id = o.customer_id
JOIN order_items oi ON o.order_id = oi.order_id
JOIN books b ON oi.book_id = b.book_id
WHERE YEAR(o.order_date) = 2022
GROUP BY c.customer_id
ORDER BY SUM(b.price) DESC
LIMIT 1;
```
